our great grandmothers, did use such a line— beginning the drying of clothes with a wringer and finishing them on the roof, or in the back But wringers and clotheslines alike have been

liminary process of flapping and jerking. But how to dispense with wringers and clothes-lines was a riddle that long baffled laundrymen. better drying method. He did it by creating the spinning "basket"—a device that extracts of the rough usage that ages wearing apparel. the water from wet clothes quickly, yet without pulling or straining of the fabric.

We have a number of these magic "baskets" in our hundry-they are one of the many points in laundering where we have been able. Make an end of the weary hours that old-style to improve more rapidly than your laundress.

If after placing a few wet clothes in your mar-ket basket, you will pivot on your heels and whirl the basket in a circle, the water will be seen to

stream from the clothes and escape through the spaces between the willows. But the clothes ing that comes to us from house- themselves will remain undisturbed.

It is by this principle that water is removed As a matter of history, old-time laundries, like from clothes in our laundry—only the "basket" in which your washing is placed spins like a top. In the sides of the basket are many small holes through which the water sprays away. Of course the device is encased—just as you might confine a spinning top in a teacup.

dispensed with in our modern plant. Clothes are dried by us without any of the ancient predestructive to fabrics. No drying method in the home has ever been developed to equal it.

Upon removal from the basket, your clothes It was left for an ingenious inventor to find a are ready for the next step in our laundering process. There are no buttons torn off; none
